REPAIR&MAINTENANCE OF FLOWMETERS

Regardless of the brand and model, we carry out the maintenance, repair and calibration of all your flowmeters up to DN 2000 diameter, as well as MID certified flowmeters, with our expert technical team in our contracted company approved by the Ministry of Industry.

Our company that performs transactions such as flow tube winding replacement, electrode replacement, inner coating replacement, signal converter repair, rust removal and paint renewal and aftercare adjustment for industrial flowmeters with its expert staff, makes your devices like the first day.

## CASE STUDIES

**After maintenance and repair, your flow meters are delivered with Türkak Accredited calibration.**
